

Hello Robot: Democratizing Mobile Manipulation with ROS

Applications

12:20 - 12:40 CDT

Binit Shah, Aaron Edsinger, Charlie Kemp

Hello Robot presents the Stretch RE1, a compact, lightweight, and capable mobile manipulator for indoor human environments. This talk will cover the story of Stretch, the growing community and ecosystem around the platform, and the role of ROS with an emphasis on ROS 2. We will provide examples of ways universities, startups, and large companies are using Stretch, including research on assistance for people with disabilities. Notably, Hello Robot's code for Stretch is primarily in Python and all of it is open source on GitHub, including the firmware, so attendees will be able to see the code for themselves.

Democratizing Mobile Manipulation with ROS

Charlie Kemp, Ph.D.
Co-founder & CTO

Binit Shah
Lead Software Engineer

www.hello-robot.com

Charlie's Conflict of Interest Statement

Dr. Kemp is both an associate professor at Georgia Tech and the chief technology officer (CTO) of Hello Robot Inc. where he works part time. **He owns equity** in Hello Robot Inc. and is an inventor of Georgia Tech intellectual property (IP) licensed by Hello Robot Inc. Consequently, **he receives royalties** through Georgia Tech for sales made by Hello Robot Inc. He also benefits from increases in the value of Hello Robot Inc.

Summary: If Hello Robot does well, Charlie does well.

Quick Introduction to Hello Robot

The Stretch RE1

**“Beautifully
Simple, Clever
Robot Design”**

**- IEEE
Spectrum**

Hardware & Software Platform

- Compact, lightweight, contact sensitive, calibrated
- \$19,950 for a **complete robot**
 - gripper
 - sensors
 - onboard computer
- Open source software
 - From firmware up
 - Python & ROS

Transparency & Openness

Simple Pricing

Ex-Googler's Startup Comes Out of Stealth With Beautifully Simple, Clever Robot Design

Hello Robot's Stretch wants to reinvent how mobile manipulators perform tasks in home environments

By Evan Ackerman and Eric Guizzo

Photo: Hello Robot

Hello Robot, founded by former Google robotics director Aaron Edsinger and Georgia Tech professor Charlie Kemp, is introducing Stretch, a mobile manipulator that weighs only 23 kg and costs less than \$20,000.

Democratizing Mobile Manipulation?

Our North Star

Mobile manipulators can improve life for everyone.

It will take time.

We can't do it alone.

Let's build the future together.

Hello Robot's Origin Story

Founding Team

Aaron Edsinger, Founder & CEO

- Founder Meka Robotics and Redwood Robotics
- Former Director of Robotics, Google
- PhD MIT CSAIL
- Built Meka and Redwood Robotics and sold to Google
- World expert on design for robot manipulation

Charlie Kemp, Founder & CTO

- Associate Professor, Georgia Tech
- Founder & Director of the Healthcare Robotics Lab
- PhD MIT CSAIL
- World expert on assistive mobile manipulation

The first Roomba from 2002
Almost 20 years ago!

What is the Roomba of mobile manipulation?

What body for **indoor** mobile manipulation in homes and workplaces?

- Flat smooth surfaces
- Visible from human head height
- Reachable by human arms
- Children, older adults, and pets

Stretch's Ancestor

EL-E from 2008

- Statically stable
- Small footprint
- Lightweight
- Cameras high
- Reach flat surfaces
